

Clear2there Video Surveillance as a Service

Enjoy the benefits of the cloud – simple,
cost-effective and reliable!

The safety and security of employees, customers and property is of the utmost importance to business owners. A video surveillance system provides an excellent means of monitoring and protecting these valuable assets. Clear2there is making it easier than ever for any organization to enjoy the many benefits of video security with its Video Surveillance as a Service (VSaaS) offering.

Clear2there VSaaS is a cloud-hosted, subscription-based video security system that allows users to remotely manage, access, record, and store video content entirely in the cloud. This model offers low up-front capital expenses and a predictable monthly operating cost.

Because the Clear2there cloud-based video surveillance platform records, processes and stores video in the cloud, it eliminates the need for costly on-premises equipment. With no servers or software to install and manage on-site, any business can quickly and easily deploy an enterprise-class video surveillance system. Our VSaaS model reduces the need for IT involvement by automating all software updates and maintenance. For one low monthly subscription fee, you receive cloud service and storage, cameras and licensing, updates, and support.

CLEAR2THERE VIDEO SURVEILLANCE SYSTEM ADVANTAGES

Video surveillance systems from other solution providers often require a user to download and watch large sections of video to find a specific incident of interest. Additionally, sharing the video can require copying to a separate file and emailing it as an attachment or saving it to a DVD. Clear2there's remote monitoring capabilities enable video to be viewed from any location, at any time of the day or night over a smartphone, tablet, or computer. Our intuitive web-based interface is remarkably easy to use and doesn't require installation of any software. Via a unique touch-enabled snapshot timeline, you can quickly locate video for a specific event, and then easily review, archive and share that video with others as needed.

With a focus on interconnectivity, the Clear2there Viewbiquity Cloud Application Suite (VCAS) can fully integrate your video surveillance system with a broad mix of other Clear2there best-of-breed systems and components, including access controls, HVAC, lighting, intrusion and security, environmental, energy management and more. The Clear2there VCAS platform provides:

- **An easy-to-use web interface:** Manage and review your video surveillance systems via our easy-to-use web interface, which can be accessed directly from any internet-connected smartphone, tablet, desktop PC or other device.
- **Intelligent automation and management:** Create and edit customized schedules and automation rules that enable intelligent business management.
- **Automated notifications:** Receive real-time alerts via email, text message and even text-to-voice phone calls informing you of activity within your business.

Key Business Benefits

- **Rapid Solution Deployment:** The elimination of on-site servers, storage, networking gear and software means faster system deployment and configuration.
- **Lower Costs:** Clear2there VSaaS offers low up-front capital expenses and a predictable monthly operating cost.
- **Flexible Storage Retention:** Select a subscription plan option offering 30, 60 or 90 days of cloud video storage, all in stunningly clear high definition resolution.
- **Superior Video Management Technology:** Clear2there cameras deliver exceptional compression and noise reduction performance for better picture quality and superior bandwidth efficiency.
- **Simplified System Administration:** Process intensive hardware and software reside in the cloud, with updates and ongoing maintenance managed off-site by Clear2there.
- **Advanced Security and Reliability:** Store your video safely on enterprise-grade hardware in highly secure, state-of-the-art data center facilities that comply with the most rigorous industry security standards.
- **Investment Protection:** A cloud-based solution offers risk-free technology longevity and is better equipped to meet the present and future needs of your business.
